

ENGAGING PEOPLE

**to make the Angers region THE go-to place
for IOT (connected objects) in Europe!**

Join the Cooperative; we manufacture connected objects
in the Grand West region of France and promote our regional companies
on the international arena.

**JOIN THE #ANGERSFRENCHTECH
COOPERATIVE**

And help the Angers region becomes
THE go-to place in Europe for IoT (Connected Objects)

Since 2015, the collective operating under the #AngersFrenchTech label has been actively promoting the construction of Angers' reputation for IoT in France and internationally, with the participation of regional stakeholders including higher education, public and private sector organisations, groups, innovative SMEs and startups.

Where the digital, electronic and manufacturing worlds meet the day-to-day operations of startups and small and medium-sized enterprises, and with a cultural mix of the facilities and good will of our stakeholders, many projects have flourished. Angers and the West of France is now one of the most important ecosystems in terms of IoT.

This is where the electronics industry of the future is invented and it will become the bedrock of the Smart World.

To respond to the challenge, bring projects more effectively to fruition and increase our operations (see the «Feuille de Route #AngersFrenchTech [#AngersFrenchTech roadmap]-September 2017»), we are establishing the collective as a legal entity and structuring it to operate collaboratively: working together we can create and support projects dedicated to IOT in Angers as a Cooperative.

In accordance with the #AngersFrenchTech mission (see «Challenges») we appeal to you to join this SCIC (Special Interest Cooperative with simplified shares of variable capital) which will operate as a startup according to Michel Perrinet, the #AngersFrenchTech Delegate. On the programme: «See the big picture, aim high, move fast...and release the brake!»

Here you'll find all the entrepreneurial talents in Angers who have come together to create economic value and jobs in the region, by developing startups in particular to form contracts with electronics companies in the region.

The Cooperative : 1 member = 1 vote

Mission :

- internationalisation in our DNA and a lever for reputation-building
- to use activities as a vehicle for acceleration
- to amalgamate and maximise the potential of the local ecosystem

Values : a sense of collective interest, fertile cooperation, confidence in our skills, commitment and creativity.

Governance : the cooperative is a new way of organising collaboration between companies, academics, individuals and public and private organisations with a common economic vision for the region.

Priorités stratégiques :

- Early 2018: set up the #AngersFrenchTech/Numa Angers IoT startup accelerator in the Wise'Factory premises near the Parc des Expositions d'Angers [exhibition centre].
- Boost regional initiatives: IoT research, Connected Week 2018, Smart City trial processes by Pavic, LegalTech IoT, etc.
- Create a space to act as base for the ecosystem where it can come together; a third facility of over 3000m², including an innovative business centre and the #AngersFrenchTech Co-operative, at the Central Post Office in Angers city centre.

Get involved, take part, have your say... Join the #AngersFrenchTech Cooperative adventure
